Citrix ICA Client Installation

1. Insert disk1 into your floppy drive.
2. Click on the “Start Menu” and select “Run”.

3. In the text box, type “a:\setup.exe” without quotes.
4. Select OK.
5. On the “Welcome” screen, select “Next”.

6. You will then be prompted for an “Installation Location”. Leave the default and select next.
7. On the “Program Folder” selection screen, leave the default and click OK.

8. On the “ICA Client Name” selection screen, leave the default or enter in your username and select “Next”.

9. Following will be an installation progress screen.

10. Upon setup completion, select OK.
11. To start the client, go to the "Citrix ICA Client" program menu and select the Remote Application Manager.

12. When prompted to add a new entry, select “Yes”.

13. Select “Network” and click “Next”.

14. For Description, enter “Surgery-Remote”
15. For Network Protocol, select “TCP/IP”.
16. Following, select “Server”, and enter the following digits into the blank text box: 128.125.97.226
17. On the following screen, choose the “low bandwidth” option and select “Next”.

18. When prompted for a username and password, leave the fields blank and enter “usc-surgery” into the domain field. Click “Next”.
19. On the next screen, click on the “Change” button.

20. For best performance, uncheck the “use default” options.
21. Select “640x480” for window size.
22. Select “16” for window colors.
23. Click OK, then select “Next”.
24. Leave the “Application” and “Working Directory” fields blank and select “Next”.

25. On the subsequent screen, leave the defaults and select “Next”.
26. Click “Finish” on the final installation screen.

27. Return to the “Application Manager” window and double click on the new “Surgery-Remote” connection created.
28. The connection will start, and you will be prompted for a username and password. Enter your Novell network username and password to login.

29. You may now use the available applications.
30. When finished, please logout correctly.
31. Click on the “Start Menu” and select “Logoff”.
